

Website Folder Structure

website	node_modules	@react-spring		Library -> smooth animations using spring physics	
		@react-three	drei	Library -> helpers to simplify cameras and other 3d logic	
			fiber	Library -> integrates ThreeJS into React	
		cannon-es => change to @react-three/cannon		Library -> lightweight 3D physics engine	
		react		Library -> component-based web architecture, uses Virtual DOM	
		three		Library -> 3D Web graphics, a simplified façade for WebGL	
	public	assets	images	General images [.png, .jpg, etc.]	
			meshes	CAD models [.obj, .glTF, etc.]	
			textures	Images for mapping onto CAD models [.png, .jpg, etc.]	
	src	celestialBodies		Code for modeling and displaying the solar system [mix of .js and .jsx] Note: simulator time is managed here.	
		components	buttons		Custom buttons [.jsx]
			other		Other React components [.jsx]
			panels		Panels for holding and managing buttons and displaying data [.jsx]
			scene		Mission setup [.js]
			vehicles	falcon	Load CAD for Falcon Rocket and manipulate it [.jsx]
				lander	Load CAD for Psyche Lander and manipulate it [.jsx]
				psyche	Load CAD for Psyche Spacecraft and manipulate it [.jsx]
				rover	Load CAD for Psyche Rover and manipulate it [.jsx]
				sampleRocket	Load CAD for Sample Return Rocket and manipulate it [.jsx]
		controllers	falcon		Logic for Falcon Rocket [.js]
			lander		Logic for Psyche Lander [.js]
			psyche		Logic for Psyche Spacecraft [.js]
			rover		Logic for Psyche Rover [.js]
			sampleRocket		Logic for Sample Return Rocket [.js]
			other		Other supporting logic [.js]
		css		CSS files [.css]	
		pages		Webpage files [.jsx]	
		shaders		Shader programs [.glsl] Not working yet	
		tests			Unit Tests [.js]
